

# LOST AND FOUND PORTAL

WEB-BASED REPORTING AND CLAIM SYSTEM

**GROUP-1**

**NEVIN,NITHIN,SANDRA,SHABAS,TESA,SNEHA**

# INTRODUCTION

- Many lost items go unclaimed due to lack of communication.
- Our portal bridges the gap between users who lost items and those who found them.
- Offers a digital and streamlined way to report, view, and claim items.

# FEATURES

- User Registration and Login
- Report Lost Items
- Report Found Items
- View All Reported Lost Items
- Claim Found Items
- Approval Workflow(Lost item owner confirms match)
- Status Tracking (lost, pending, found, rejected)

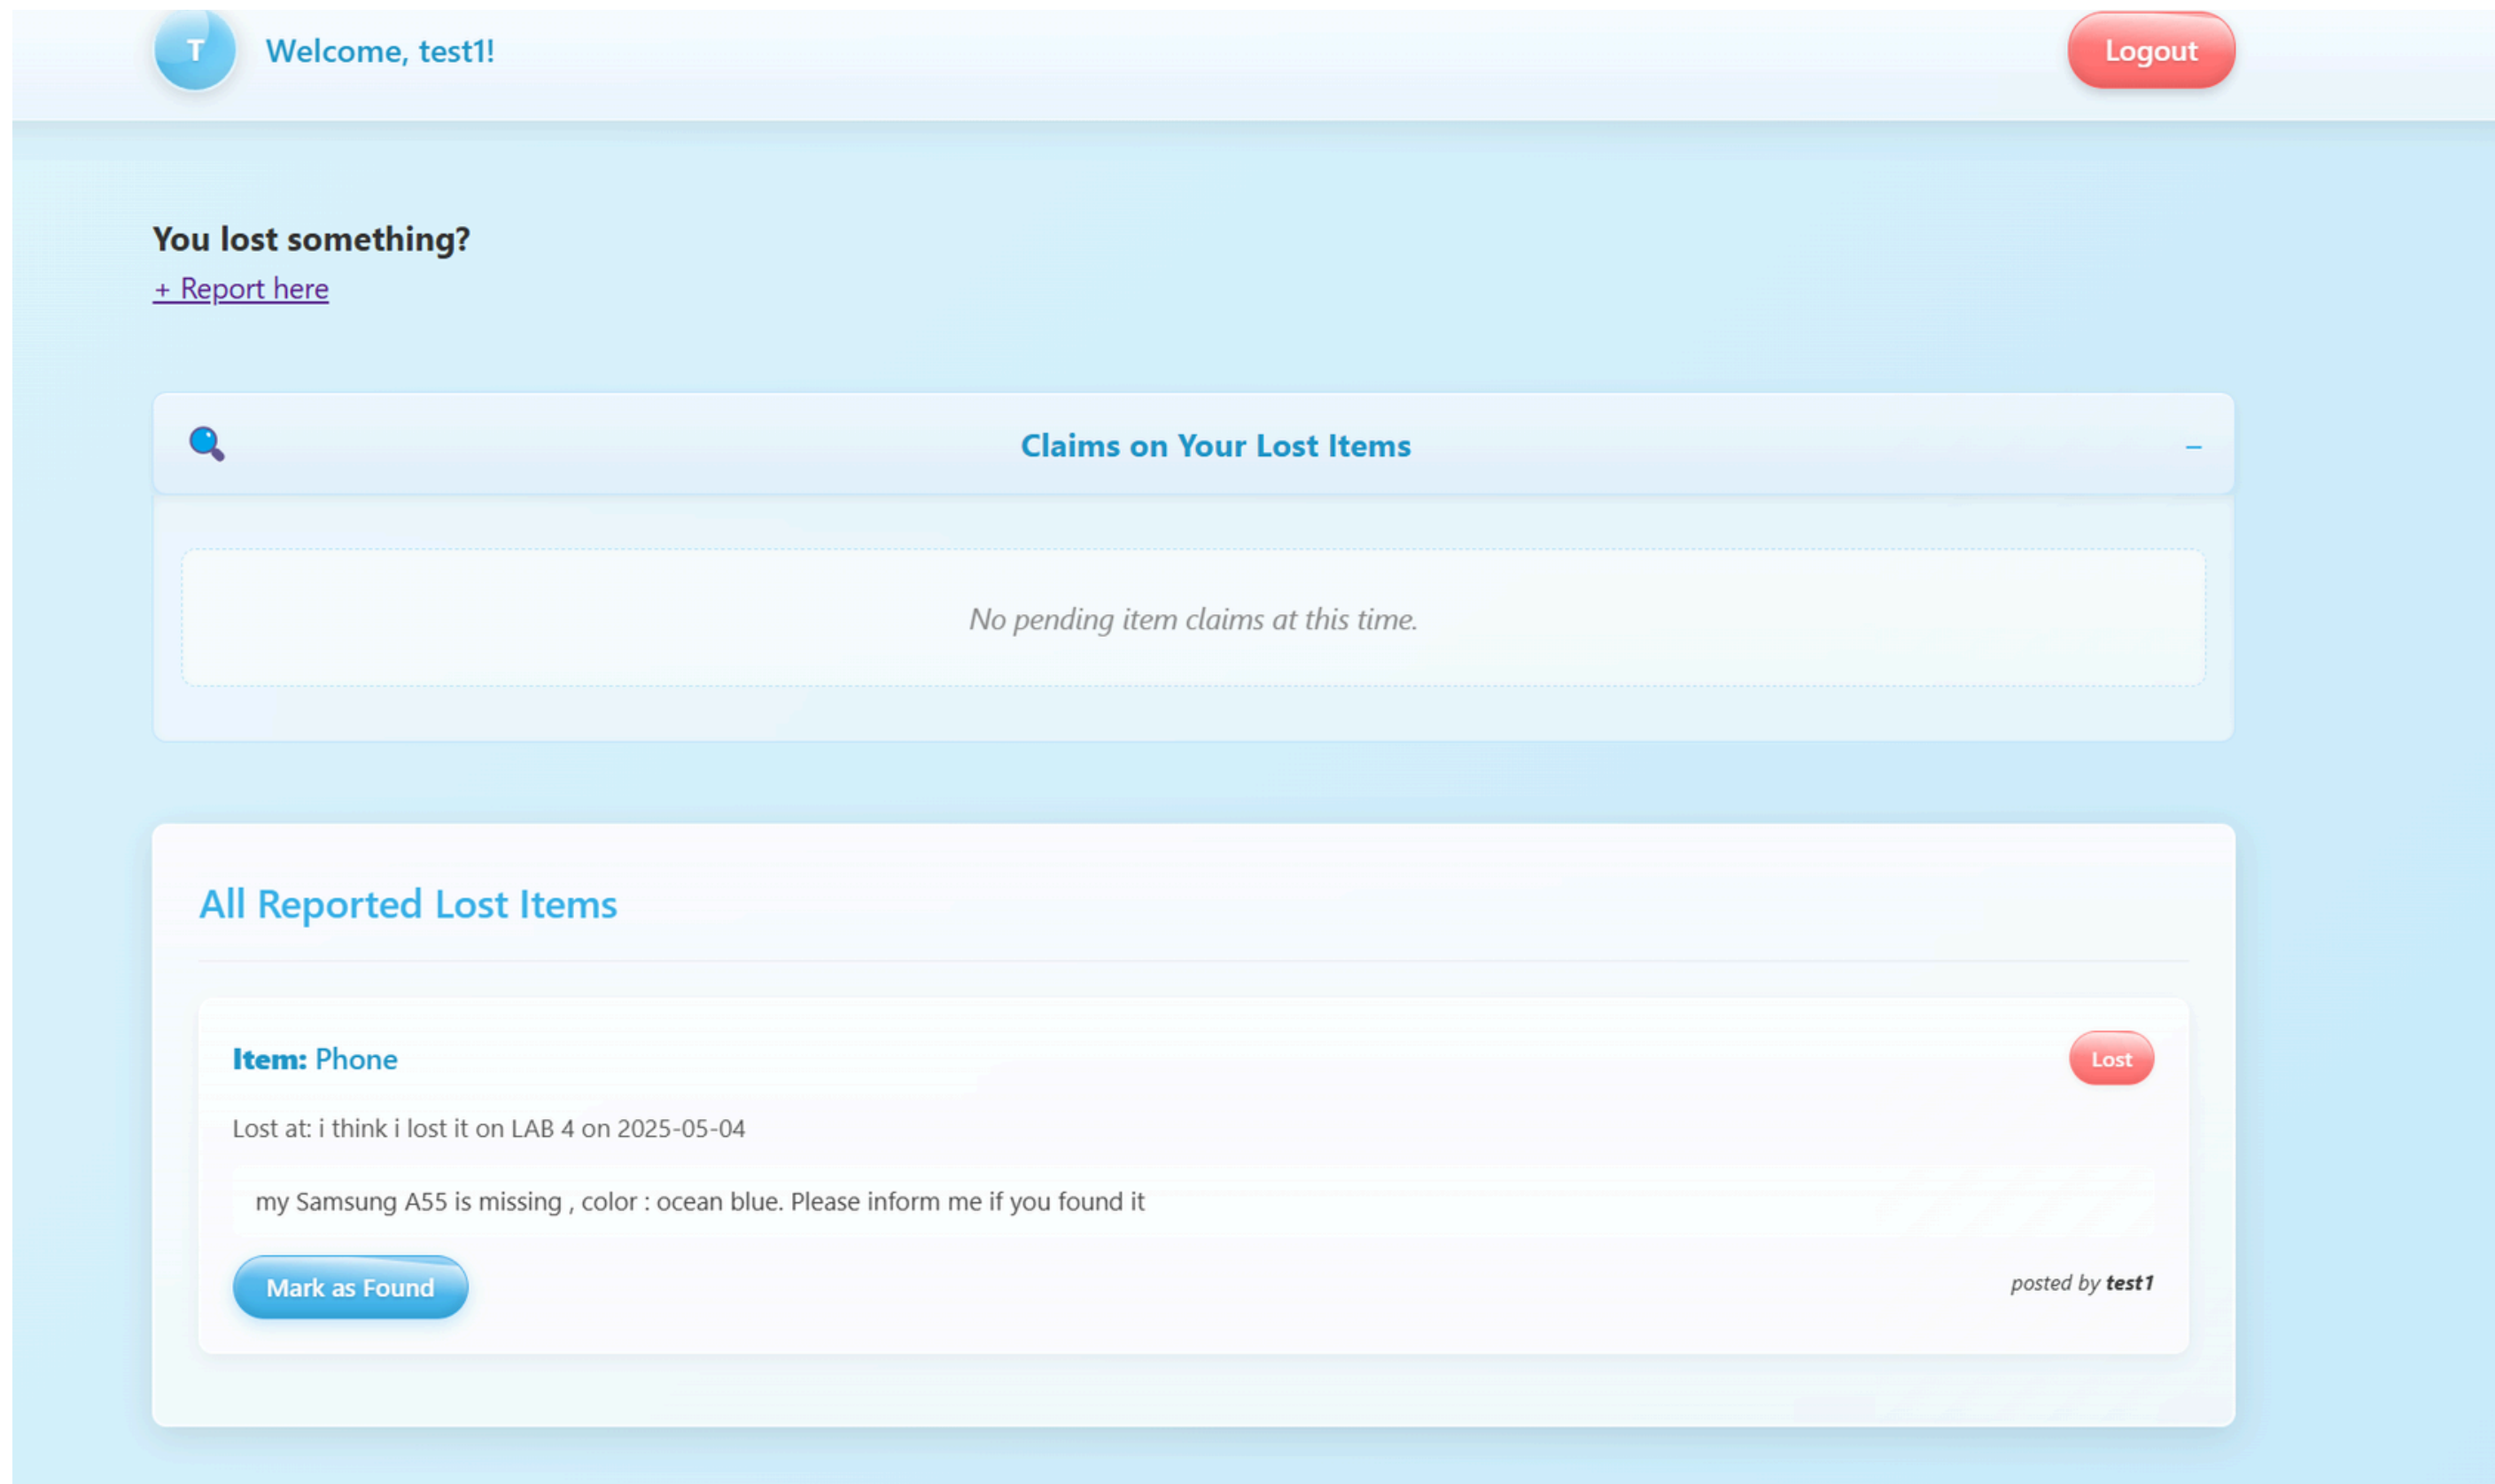

# TECHNOLOGIES USED

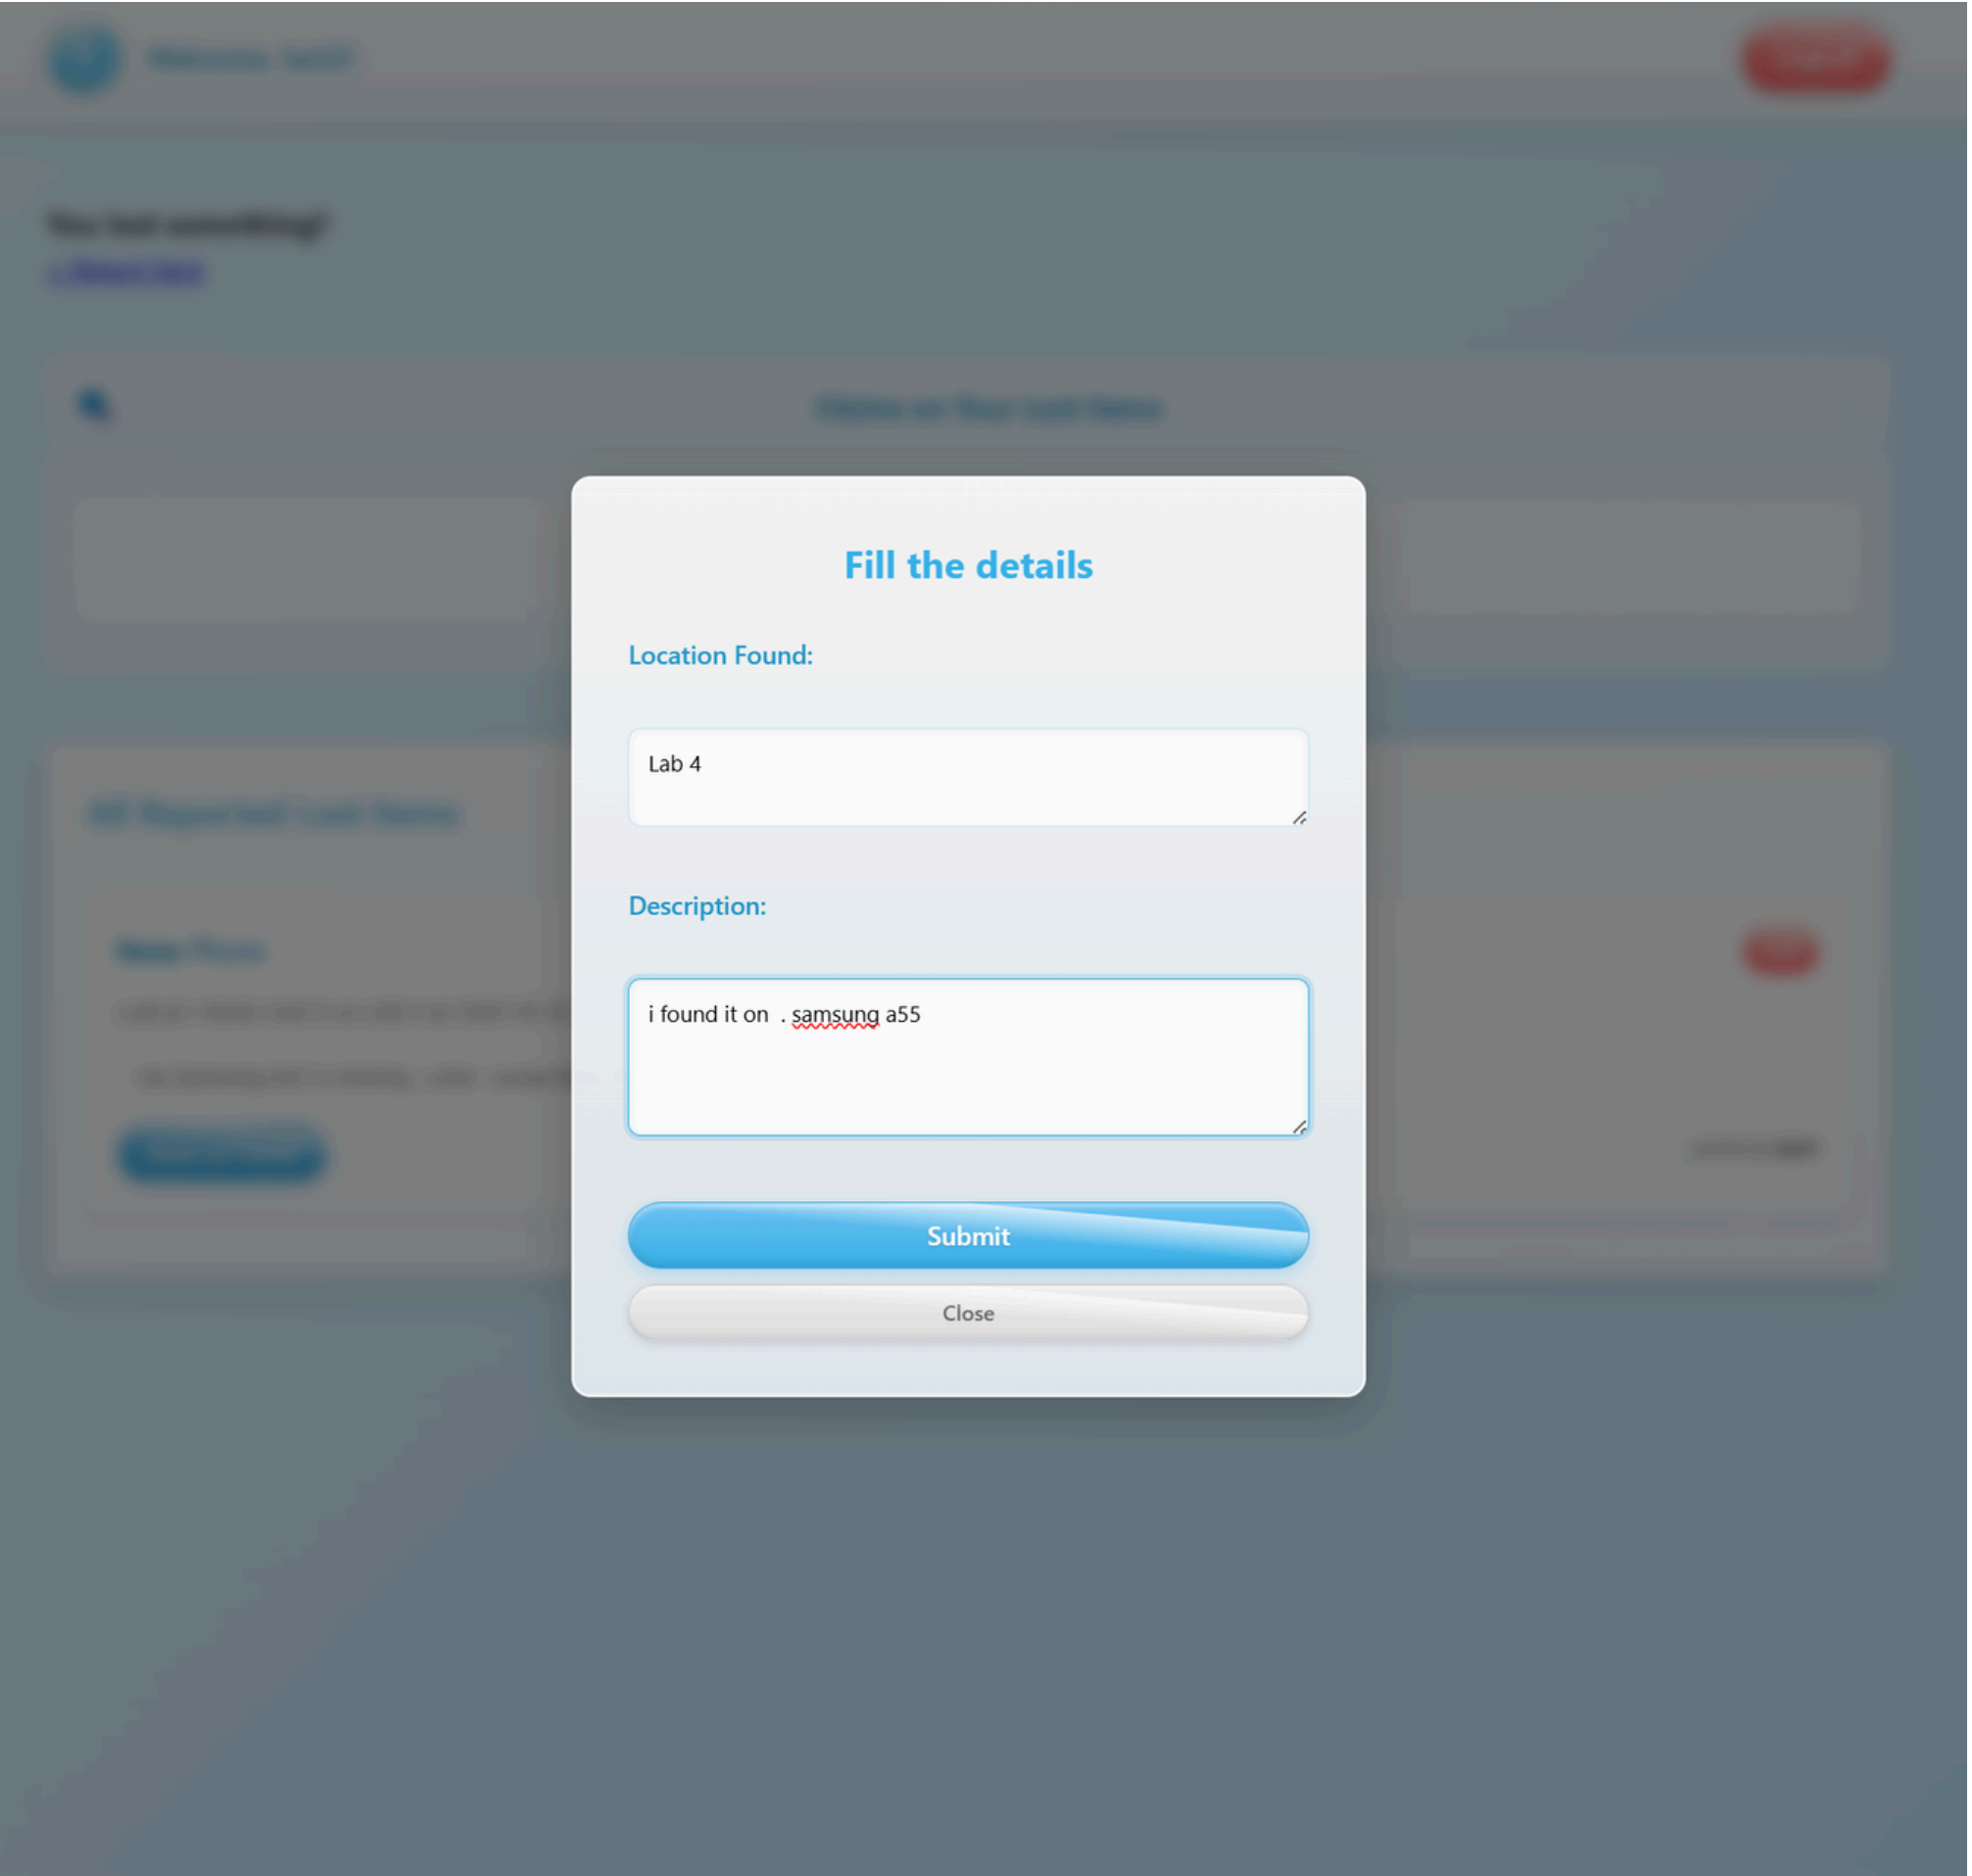

- **Frontend: HTML, CSS, JavaScript**
- **Backend: PHP (OOP)**
- **Database: MySQL**
- **Server: XAMPP (Apache)**

# WORKFLOW

1. User reports a lost item.
2. Another user clicks "Mark as Found".
3. A popup form appears for entering found location and description.
4. System stores the claim as pending.
5. Lost item owner reviews and approves/rejects the match.
6. If approved: item status = found

# USER INTERFACE

## **Simple dashboard layout:**

- User's lost & found reports.
  - All open lost items.
  - Buttons to report new or claim existing items.
  - Popups for smooth interactions.
- 

# Future Improvements

1. Email or SMS notifications
2. Image upload support
3. Admin panel for moderation
4. Public view page

# CONCLUSION

- A practical solution for a common problem.
- Easy to use, efficient, and community-driven.
- Helps return lost items to rightful owners.

The image features a light cream background with the words "THANK YOU" centered in a bold, brown, sans-serif font. The corners of the image are decorated with stylized, abstract shapes in shades of brown and orange, resembling watercolor splashes or ink blots. These shapes have irregular, wavy edges and some contain small white dots or dashes.

**THANK YOU**
